

Shipment of your orders

Courier Service - With tracking of parcels to your door.

The Cellar Plus team have an excellent reputation for prompt despatch of customer orders. The warehouse team are well experienced to ensure that goods are always safely packed.

When it comes to transport couriers, we only support professional operators that offer a quality service to our clients, including barcode scanning from depot to depot and customer sign off is compulsory at its planned destination.

Some of our products (like Storage tanks & Grape Presses) can sometimes be oddly shaped. So where the cubic size is greater than the actual weight (kilograms) most couriers will charge on this value(Dead weight) . In this situation, sending the order on a pallet rate might work out better value, thus give you the opportunity to add other items to the order for no extra. If you're not sure, please request a confirmation on despatch.

If the cubic sizes are **L30 x W40 x H20** cm
4000 (factor)

The cubic weight
Carriers will use is - **6kg**

or equivalent cubic
L30 x W40 x H30 =10kg

or cubic L50 x W40 x H50
= 25kg
